

Step Inside Jurassic World At This Amazing Exhibition Coming To Toronto This Spring

Join the waitlist to come face-to-face with the fascinating dinosaurs from Jurassic World at this incredible exhibition.

MARIE-ANGÈLE ZOUNGRANA - COMMERCIAL EDITOR · FEBRUARY 23, 2023

Jurassic World: The Exhibition Universal Studios and Amblin Entertainment, Inc. All Rights Reserved.

As Ray Arnold would say, “hold onto your butts” — [Jurassic World: The Exhibition](#) is heading less than one hour away from Toronto! Beginning April 14, **dinosaurs from the cinematic blockbuster** will claw their way into the real world so dinosaur aficionados and *Jurassic Park* lovers can get a close-up look at them in all their sharp-toothed, razor-clawed glory! **Channel your inner paleontologist** as you come face to face with life-sized recreations of these prehistoric creatures and examine amber-trapped specimens in the Hammond Lab.

[Join the waitlist to get exclusive access to tickets before they're released to the public on February 28 at 11am!](#)

Hum the iconic [Jurassic World](#) tune as you head through wooden gates, placing you right in the middle of the series' adventure. Square One Shopping Centre **will be made over as a prehistoric wilderness** complete with all the plants, leaves, and branches you'd see in the millennia-old forests of the Jurassic period. But be on the lookout at all times—you wouldn't want a devious dinosaur sneaking up behind your back!

[Join the waitlist now to be first in line for the chance to explore the prehistoric world of dinos.](#)

As you explore [Jurassic World: The Exhibition](#), keep your eyes peeled for all sorts of roar-some dino delights. **Each dinosaur replica has been re-created in unbelievable detail**, from the herbivorous Brachiosaurus—one of the largest creatures to ever exist—to the Tyrannosaurus Rex, complete with its signature bone-crushing grin.

Though, of course, there will still be some room for “awws” to fill the room as you gaze upon some adorably wide-eyed baby raptors, pterodactyls, and parasaurolophus babies.

[Jurassic World: The Exhibition](#) is a must, not only for fans of the epic film franchise, but for prehistoric lovers in general. How often do you get to say you've put yourself in the mud-splattered boots of Owen Grady and seen for yourself where *Jurassic World* all started: Hammond Creation Lab. And, who knows, you may even learn the secret to bringing these creatures back to life!

Meet the dinosaurs of Isla Nublar. [Join the waitlist to Jurassic World: The Exhibition!](#)
